

RAILEX AREA GUARD FOR SALON OR BARBER SHOP

The cantilever mobile guards with locking casters can easily be moved and re-configured. This is ideal for situations where you need to constantly move or re-arrange the guards such as a salon or barber shop. Separate work areas as per CDC recommendations. These area guards are robust with overall height of 6'6" and width of 3'8". To see our full line of Area Shields go to our website and in the products tab go to "PPE". We make 5 standard sizes. You can also see our YouTube video where we show you the area guard resin panel surviving the "whack" test with a 2x4! If you need a custom size, we can design an area guard per your specs right here in house at Railex.

Railex initially got involved in the fight against coronavirus by making Face Shields. To learn more go to www.railexfaceshield.com
